空陸兩用之汽車，無需打字帶的打字機，廚房內應用之紫外線可使堅硬的肉食化爲柔軟，自動開關的門，能自來水和煤氣一樣安裝的冷氣，能移動的嘴吸，用電力來溫暖道路和衣服，無線電供給緊急追加的通訊，並能預知危險，

These are only a few of the features of the world of tomorrow which are "just round the corner" for all if we really want them according to Professor A.M. Low, Principal of the British Institute of Engineering Technology, reports Muriel Penn of Reuters.

這些的種種幽暗的報告說：以上這些只是明日之世界的內容一斑，而且近在目前如果我們真想要救。

In his new book, "Your World Tomorrow" just published here, Professor Low describes this new world which, he says, is within our reach in the near future. If only we are willing to devote to peacetime research a fraction of the money and effort we expended during the war on seeking new and more effective means of destruction.

在明倫彙編的職官所著「明日之世界」一書內曾論說新世界在不久將來即可實現，「惟我們肯有在此大變中研究怎樣有新而有效的辦法去消耗金錢與精力的一部分。」

Nevertheless, that search for more speedy and improved means of destruction and defence has advanced by many years the practical possibility of bringing into the everyday use many new processes, fabrics and materials which, without the war, would still be in an early experimental stage today.

然而，新式迅速而優良的破壞與防禦新法，早經各國的科學家研究新式化學化軍火實現。如果沒有戰爭，這種新法與許多資源今日仍將在初期試驗階段中。
